

Your **HIPAA-Compliant** Audio and Video Podcast Production Partner

Protecting Patient Privacy in Every Podcast

Committed to Compliance

In adherence to the HHS online privacy and tracking regulations, DoctorPodcasting proudly meets HIPAA standards and will enter into a Business Associate Agreement (BAA).

Safeguarding Data

DoctorPodcasting has implemented policies that are consistent with the physical, technical, and administrative safeguards required by HIPAA to maintain your patients' privacy.

Innovative Server-Side Solution

Our technology de-identifies and filters out personal information, enabling us to provide you with insightful analytics about your audience while protecting sensitive data.

HIPAA-Compliant Platform

Uniquely tailored to enhance your online podcast presence, our platform (as part of our podcast production services) allows seamless integration and display of your podcasts directly on your website. This secure platform sets us apart from standard DIY podcast hosting services that won't sign a BAA.

Trusted Audio Marketing Solution

DoctorPodcasting is the sole audio and video podcast production and distribution provider in the market that aligns with HIPAA's stringent data protection standards, offering you the peace of mind that your consumers' privacy is always safeguarded.
